Code Challenge

Submission
before 31st
August 2018

Register for Call for Code: <https://callforcode.org/>

The image is a screenshot of the Call for Code website. The browser's address bar shows the URL <https://callforcode.org>. The website's header features the 'CALL FOR CODE' logo on the left and navigation links for 'Register', 'Amplify', 'News', and 'FAQ' on the right. The main content area has a dark background with silhouettes of palm trees. The title 'CALLFOR CODE' is prominently displayed in large white and blue letters, with 'INNOVATION AND TECHNOLOGY FOR GOOD' written below it in smaller white text. A central message reads: 'The issue: Natural disaster preparedness and relief. How will you answer the call?'. Below this message are two buttons: 'Register For The Challenge' (highlighted with a red border) and 'Amplify The Call' (outlined with a white border). At the bottom center, there is a video player icon and the text 'Play the video (01:46)'.

The competition platform is powered by AngelHack, a Call for Code Program Supporter. Registration data is handled by AngelHack for the purpose of managing participation in the Call for Code Challenge.

The **Call for Code Global Initiative** is a rallying cry to developers to use their skills and mastery of the latest technologies to drive positive and long-lasting change across the world with their code.

For 2018, the **Call for Code Global Challenge** asks developers to create solutions that significantly improve preparedness for natural disasters and relief when they hit in order to safeguard the health and well-being of communities.

One team will win the first annual **Call for Code Global Prize**, supported by the [United Nations Human Rights Office](#) and the [American Red Cross' International team](#).

The winner will also earn several other awards that foster adoption of their application as an open source project (through the [The Linux Foundation](#)), scale its impact, and accelerate deployment in areas of greatest need.

Please respond to info@angelhack.com

Congratulations! You've taken the first step toward showing the world that developers have the power to save lives. This email confirms your registration for the Call for Code Challenge, and sets you on a path toward building a sustainable software solution to address natural disaster preparedness and effect real, positive change in the world. There's never been a better time to be a developer or a more critical time to put your skills to use for good. Check back in at <https://callforcode.org/> to see the latest news.

You'll be invited to the Slack Group shortly. This is where all communication, submission, and team building will take place.

You can sign up for an IBM Cloud account at <http://bit.ly/cfc-acct> and get started with the IBM Cloud technologies you'll use to build your application at <http://bit.ly/cfc-reg>. Your account includes access to the IBM Coder community where you can find challenges to explore reference patterns, learn about the Call for Code Captains, and have discussions with other members of the community around Call for Code in forums and on <http://bit.ly/cfc-slack>.
